The emotion around Black Panther, the first black superhero © Rhymes of Marvel, is deafening. The film, premiered today, is ready to bring home \$ 180 million this weekend. According to the Fandango Film Ticket Site, it has pre-sold more entries than any other superhero © Rhymes movie. The rumor seems justified: the cinema critics call it «incredible, cinematic, with purpose» as moving as exciting ». For many, Black Panther is more than a movie. It is a cultural phenomenon, a necessary and cheerful tribute to be black, not only in the United States, but in the global African Diaspora. Celebrities are buying cinemas in neglected neighborhoods so that black girls can see faces like their own on the screen. The Nigerians, Kenyans and Ghanes wear traditional attire to see the film. Many people not black are also anxious to share this global celebration. But it is easy to feel nervous about how to participate and respectfully support the wave of euphoria focused on identity. The answer is clearly not to silence that emotion. But you should know this: if you are white, this is once you will not see someone who looks like you on screen fighting Villains, commanding power or saving innocent people. Precisely why you should go see this movie. The power of (no) to see you in white shirts are very accustomed to seeing themselves on the screen. A study at the University of Southern California examined 800 films that came out between 2007 and 2015, and found that of 32,205 characters, just a quarter were not white. The lack of representation is most evident behind the chamber: only 5.5% of the directors were black, for example. Black Panther has an almost totally black cast and a black director. Is a gift for black girls and boys from all over who are not used to seeing themselves on the screen and it is also a gift for people not black. The narration of fictitious stories offers a unique opportunity for empathy, says Jennifer Barnes, professor of psychology in the "Fiction gives us direct access to other people's minds", he explains. "It allows us to see how other people's emotions, relationships and beliefs develop in these complicated social situations. "That's why it's crucial to look for stories that don't reflect your own life" and identity. This could be even more important for non-black children. As Black Panther suits reach the shelves, parents are nervous (paywall) about encouraging their non-black children to dress up like the King of Wakanda. In short, they should do it. Let's hope that today's children will be able to admire many more black and brown heroes as they grow up, just as children of all races and genders have fulfilled their childhood fantasies of superheroes like white men like Superman and Batman. And don't feel inhibited from talking about race. Black Panther. Children develop a sense of race from the start and may have subconscious associations with certain races when they enter primary school, so avoiding the subject in the hope that race never becomes "a problem" isn't particularly effective, experts say. On the contrary, actively promoting children's admiration for a person of a different race or identity group, in a respectful way, helps them respond and empathize with others. Taking them to see Black Panther and talk openly about why it's an inspiring milestone is a great first step. The Power of an Alternative Story It's worth remembering that, like Karen, "In 2018, we live in a world where white fantasies about Black inferiority continue to rage". Black Panther fights those pernicious and persistent fantasies with a new and inspiring story that blends reality and fantasy. Wakanda may be fictional, but its inhabitants speak a true African language. There's "Triangular Okavango, ancient, sacred geometry of Africa" all over the suit of Nigra. Ruch is E. who designed the costumes for the movie, he told The Ringer. The female combat force has Masai beads, South African leather goods and handmade jewelry armor. Meanwhile, Wakanda, interpreted as a kind of Afro-Futurist utopia, is high-tech, covered in the rich mineral Vibranium and rich beyond measure, a place that doesn't exist, but that raises the important and provocative question, "It's important that Black and non-Black people make this imaginative journey and explore how the heroism, the power and technical prowess of a country could have developed in the absence of colonialism and oppression. Of course, the movie probably won't do everything right. Concerns about cultural appropriation and African caricature have been rising ever since details about the film began to leak. But participating in this moment, as a non-Black person, is a useful thought experiment, and offers a glimpse of a tempting alternative reality. The Power of Your Money Black Panther follows the first Black-directed movie to win \$100 million in the U.S. Girls Trip. It follows Get Out, who captured the disconnect of being black in the United States, while spending 40 times its production budget. And it follows Moonlight, the story of a gay and black American who won the Oscar for Best Movie in 2017. Black Panther is not a low-budget art movie. "I hope you know when you see the movie, but the resources dedicated to this movie are the same and in fact surpass our last films", Kevin Feige, director of Marvel Studios, said Vulture. It's true. The studio spent \$200 million bringing Wakanda and her characters to life. However, Hollywood is still very white. That's in spite of the huge box office potential among the black public. African Americans, on average, visit theatres 13.4 times a year, compared to the 11 visits made by the half. With movies like Selma and Top Five, Hollywood has learned that black people will support a movie that focuses the black characters. What is important now is that the industry learns that people from other races can be identified and committed to ... and be entertained by a story with strong black characters. There is a lot of riding on the black panther. So he sees him. Buy a ticket for you, for your friends, for your lover, for your neighbor. Then talk about it, lie on it, enjoy it. And go see him again. again.
